Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted registration to the end-use product Distance Insect Growth Regulator, containing technical grade pyriproxyfen, for use in Canada on greenhouse cucumbers, peppers and tomatoes. The specific uses that were approved in Canada are detailed on the product label of Distance Insect Growth Regulator (*Pest Control Products Act* Registration Number 28414).

Corresponding maximum residue limits (MRLs) were identified in the Proposed Maximum Residue Limit document PMRL2007-01, Pyriproxyfen, published on 20 March 2007. The PMRL referenced the consultation document published on 12 September 2006, Proposed Registration Decision PRDD2006-04, Pyriproxyfen. The PMRA received no comments in response to the consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs are legally in effect as of the publication date of this document and are in addition to the MRLs already established for pyriproxyfen.

Established Maximum Residue Limits for Pyriproxyfen

Common Chemical Name	Chemical Name of Substance	MRL (ppm)	Food Commodities
Pyriproxyfen	2-[1-methyl-2-(4-phenoxyphenoxy)ethoxy]pyridine	0.80	Bell peppers
		0.25	Tomatoes
		0.02	Cucumbers

A complete list of all MRLs established in Canada can be found on the PMRA's [MRL webpage](#).
